Game Over

How You Can Prosper in a Shattered Economy

Stephen Leeb

Best-selling author and Wall Street expert Stephen Leeb reveals how the global economy is in flux....and only those who act now will be able to weather this "perfect storm" of economic disaster. In the most dramatic book that Leeb has even written, he shows how the combination of several key factors like inflation, the ever-weakening dollar, the soaring price of oil, and the increasing competition from China and India will completely change how our global economy works. The good news is that Leeb provides some key and valuable information as to how the smart investors can succeed in this financially-shifting world. Is gold still the answer? What stocks will actually thrive in a down market? What happens to the real estate market? What professions will be the best ones to choose? All of these issues, and much more, are covered by Leeb in GAME OVER. It's a frightening but mandatory reading.

STEPHEN LEEB is one of the nation's leading experts on finances and Wall Street trends. Based in NYC, he's a regular contributor to all of the major financial networks including CNBC, FOX Business, Bloomberg, and all the rest.

The Coming Economic Collapse

How You Can Thrive When Oil Costs \$200 a Barrel

Stephen Leeb & Glen Strathy

As the world faces an energy crisis of unprecedented scope, renowned economist Stephen Leeb shows how surging oil prices will contribute to an economic collapse. With meticulous research and analysis, Leeb shows that due to strong competition from India and China, prices could soon double, a cost for which most countries and investors are ill-prepared. Now, in this groundbreaking book, Leeb not only shows how this crisis will affect consumers, but how savvy investing can turn these dire times into financial gain.

The Oil Factor

Protect Yourself and Profit from the Coming Energy Crisis

Stephen Leeb & Donna Leeb

An inflationary 'perfect storm' whipped up by skyrocketing oil prices that will lay waste to millions of portfolios if investors don't prepare. Renowned financial advisor Stephen Leeb asserts that in this perilous period, oil prices will drive all other economic indicators. But there is a way to diversify away from disaster by diversifying your portfolio, such as investing in metals like gold and silver. Filled with sound advice for an unstable marketplace, this is the book no investor can afford to miss.
