RED ALERT : HOW CHINA'S GROWING PROSPERITY WILL STRANGLE WORLD GROWTH

STEPHEN LEEB WITH GREGORY DORSEY

Everyday brings more ominous headlines about China and its growth in power, whether it's their expanding their navy to protect their foreign oil deliveries or banning Google from inside its borders, China is definitely on the move. While experts may disagree about China's overall strategy, one thing they all agree upon - that China's time as an economic superpower is fast arriving.

Did you know?

- *China is quietly purchasing vast amounts of the earth's remaining oil and gold.
- *China is a major player on Wall Street and control billions in American investments.
- * While the US has been fighting wars in Iraq and Afghanistan, China has been upgrading its inner-structure and industrial strength.
- * The Chinese control most of the world's rare earth resources, all of which are essential for cell phones, computers, electronic devices, etc.

RED ALERT will be a most provocative and, in truth, a frightening examination about the growing political, economic, and social power of China and the threat that nation poses to the Western world.
