ROBERT LUDLUM'S™ THE ARES DECISION KYLE MILLS

"Don't ever begin a Ludlum novel if you have to go to work the next day."

—*Chicago Sun-Times*

Covert-One's top operative, Army microbiologist Colonel Jon Smith, is sent to investigate a seemingly supernatural attack in Northern Uganda and finds evidence of a parasitic infection that for centuries has been causing violent insanity and then going dormant. This time, though, it's different. The infection is purposely being kept alive and the director of Iranian Intelligence is in Uganda trying to make a deal for a biological weapon to unleash on the West.

In the eighth book in the *Covert-One* series, Smith and his team are cut off from all outside support, they begin to suspect that forces much more powerful than the Iranians are in play—forces that can be traced to Washington itself.
